

Pneumatic eccentric grinder

YT-09739

Professional eccentric grinder supplied with compressed air stream. Thanks to abrasive consumables fitted directly on discs it makes it possible to grind and polish different types of materials. Used in automotive service workshops and industry.

0.63 MPa	84 l/min	 12000 min ⁻¹
150 Ø [mm] 	2.5 mm  ECCENTRIC	360° ROTATED AIR EXHAUST
0.65 kg ULTRALIGHT	 STANDARD	

- disc diameter: 150 mm
- pressure: 0.63 MPa
- capacity: 84 l/min
- max. rotational speed: 12000 rpm
- smooth regulation of rotational speed
- 360° rotary air blow-out
- oscillation of 2.5 mm provides for optimum surface treatment
- standard connection
- the set includes: connection for compressed air installation
