

Pneumatic ratchet

YT-09795

Pneumatic ratchet supplied with compressed air stream. Designed for works under heavy loads in vulcanization and automotive service workshops – fast assembly and disassembly of threaded unions and sub-components. Replaces manual drive ratchets, reducing time needed for servicing action and facilitating work in hard-to-reach areas.

BODY

- torque: 27 Nm
- pressure: 0.63 MPa
- capacity: 113 l/min
- max. rotational speed: 180 rpm
- smooth regulation of rotational speed
- right/left direction of revolutions toggle switch
- 360° rotary air blow-out
- light, composite housing and small dimensions provide for comfortable operation
- power switch lock secures against undesirable switching on
- safety clamp protecting the attachment from disconnecting
- standard connection
- spindle size: 1/4" (6.3 mm)
