

Magnetic level

YT-30060

Professional magnetic level designed to mark vertical and horizontal lines. Equipped with 2 precision acrylic glass vials filled with visualization fluid. Suitable, among others, for construction, carpentry and welding works: assembly of structures, setting up profiles for drywall systems etc.

- measurement accuracy: 0,5 mm/m
- mirrored surface underneath the vials for the illumination and magnifying glass effect for easy measurement and reading
- durable construction ensures repeatability of results
- made of powder-coated aluminium profile
- bumps mounted in plastic absorb shocks and impacts
- magnetic base enables stable fixing to metal surfaces
- handle in the body is finished with elastic material for comfortable work
- special hole allows you to hang the level, for example on the tool wall or shop shelf
- length: 400 mm
- YATO 600, 800, 1000 and 1200 mm spirit levels are also available

400 mm
