

Universal HEX drills

Universal drill bits, which thanks to a special spiral construction enable drilling in almost all materials – metal, concrete, aluminum, ceramics, wood and plastics.

- YG6X tungsten carbide blade with a hardness of 89-91 HRC
- drill body with a hardness of 42-45 HRC
- the spiral geometry accelerates discharging excavated material
- efficient, durable and resistant for damage and blunting
- hexagonal HEX 1/4" holder (6.3 mm) enables fixing to cordless screwdrivers and impact wrenches
