

Angle grinder with rotating handle

YT-82110

Very powerful angle grinder, recommended for professionals. Excellent for cutting and grinding of metal and mineral building materials.

- high power prevents disc locking while cutting hard materials
- motor winding made in full of high quality copper resistant to temperature of up to 200°C
- adjustable handle position
- well-fitted gearbox with hardness of 53–56 HRC
- rotor and gearbox cooling air circulation protects the device against penetration by dust
- easier replacement of carbon brushes thanks to access to them from the outside
- soft start
- thick rubber cable with length of 3 m, resistant to mechanical damage
